MATH 201 Your name: _____

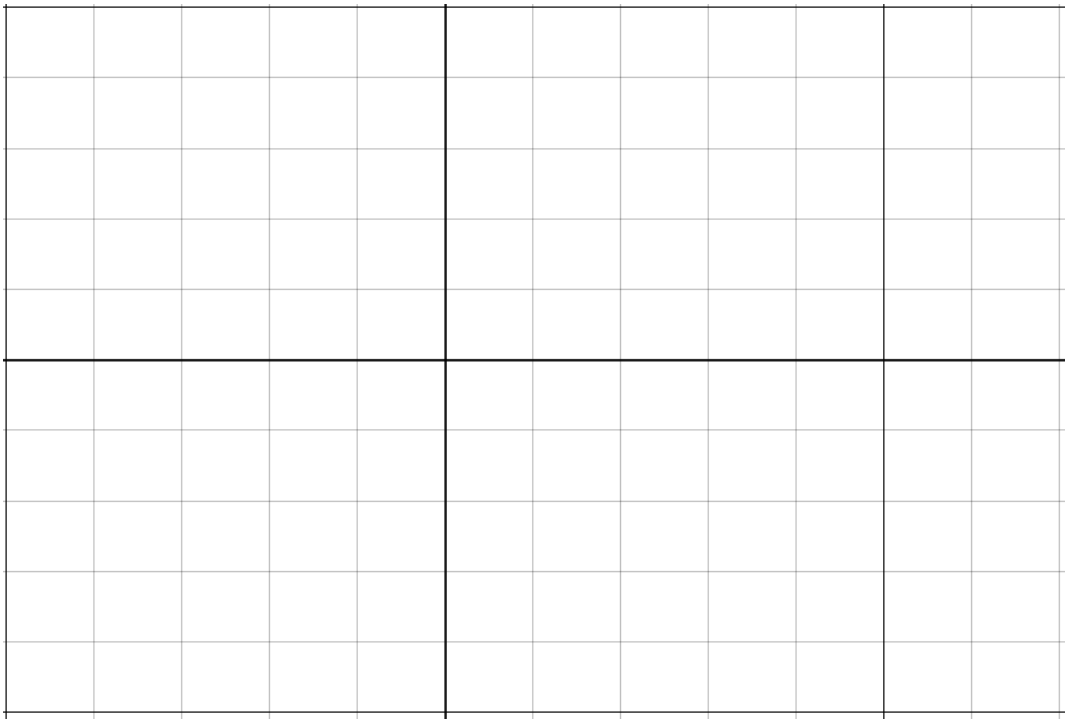

Learning target 1.4-G, version 1

Given a graph of a function, estimate specific values of the derivative, and/or produce a sketch of the derivative function.

Here is the graph of some wacky function $q(x)$:

Sketch the graph of $q'(x)$ on the blank axes below.

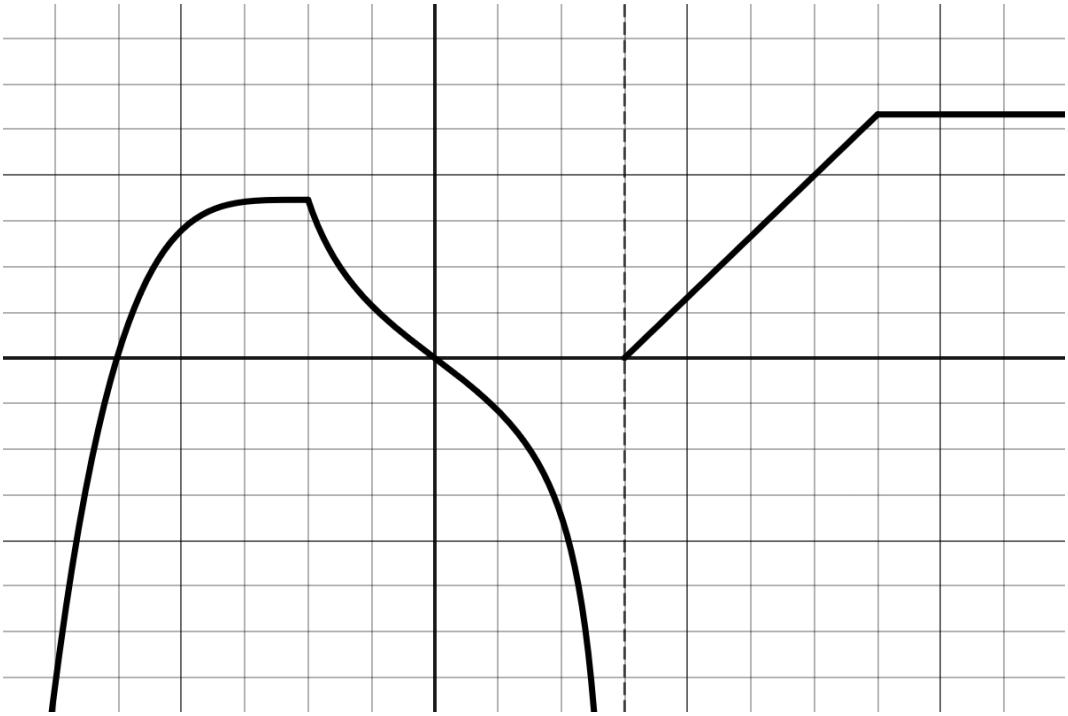

MATH 201 Your name: _____

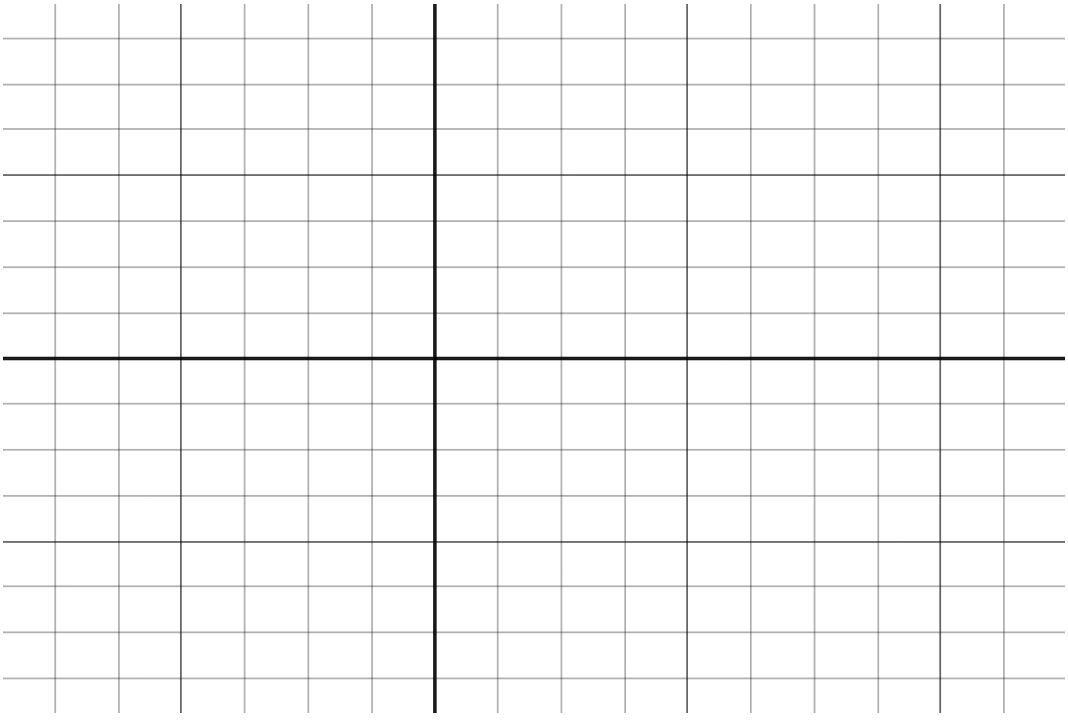

Learning target 1.4-G, version 2

Given a graph of a function, estimate specific values of the derivative, and/or produce a sketch of the derivative function.

Here is the graph of some wacky function $h(t)$:

Sketch the graph of $h'(t)$ on the blank axes below.

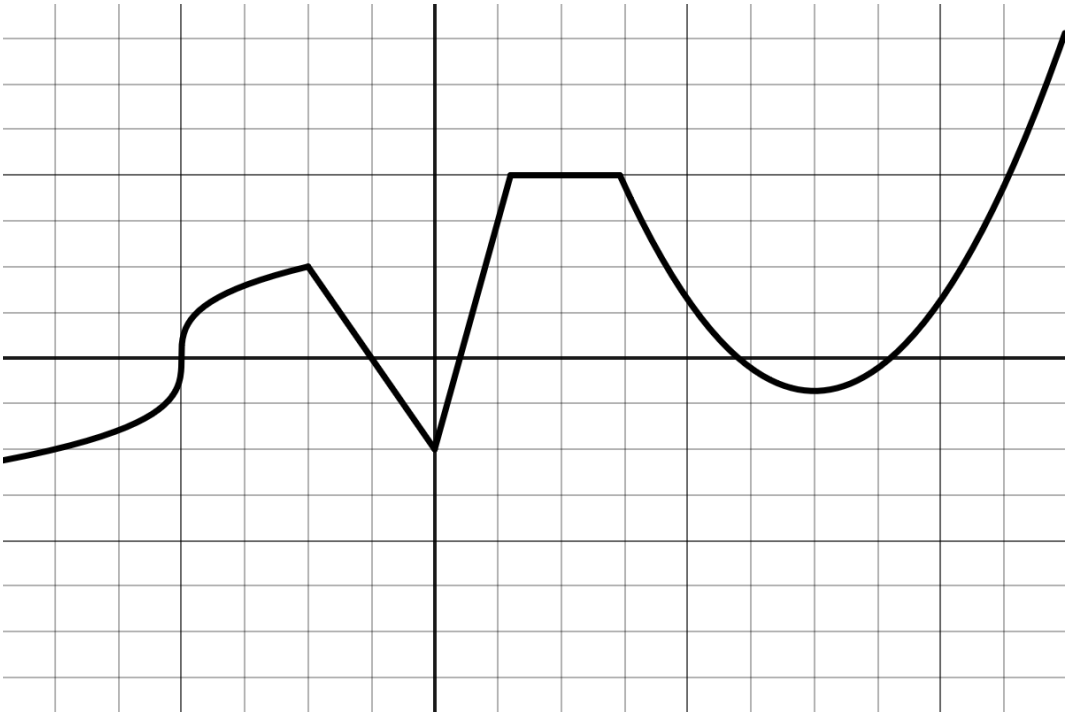

MATH 201 Your name: _____

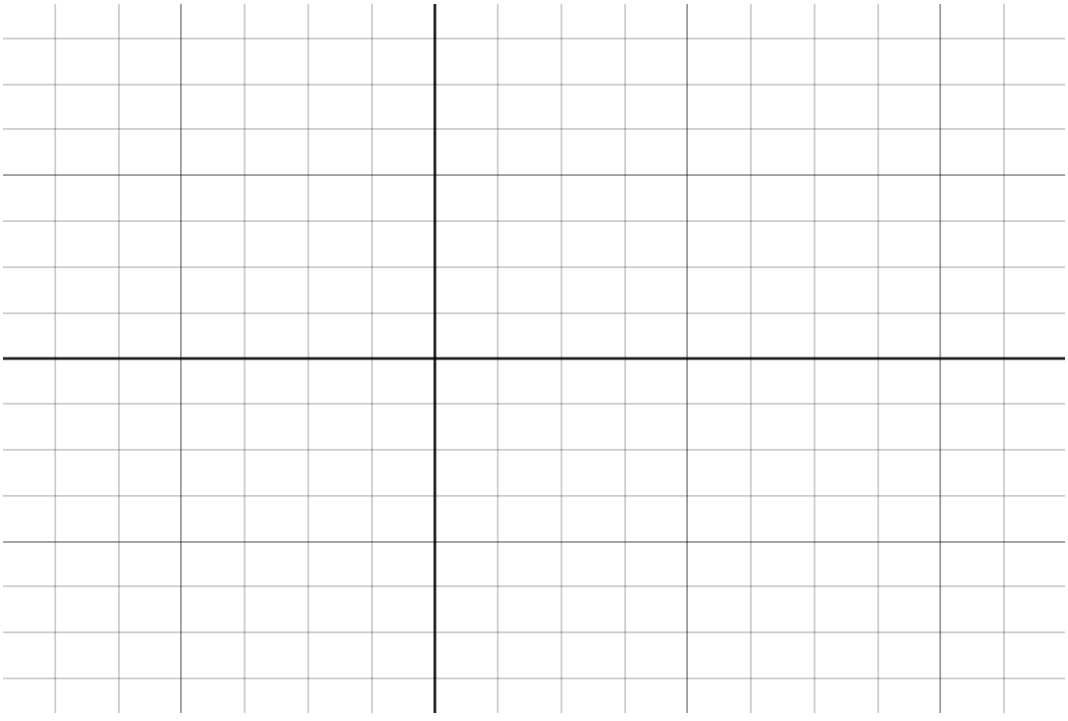

Learning target 1.4-G, version 3

Given a graph of a function, estimate specific values of the derivative, and/or produce a sketch of the derivative function.

Here is the graph of some wacky function $z(x)$:

Sketch the graph of $z'(x)$ on the blank axes below.

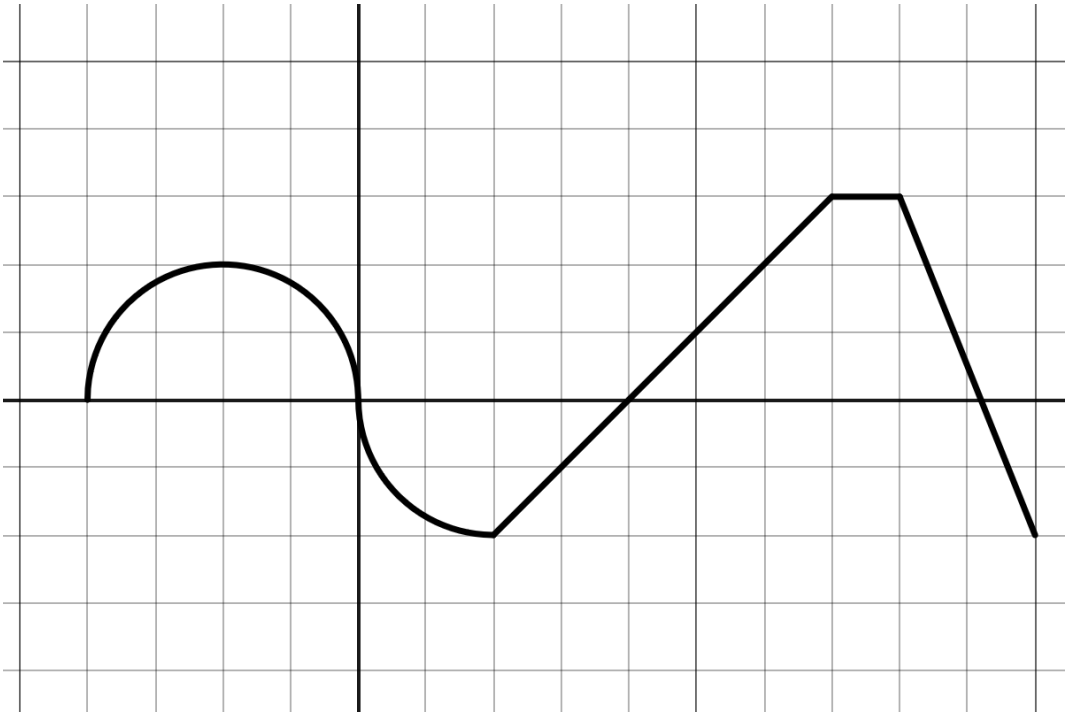

MATH 201 Your name: _____

Learning target 1.4-G, version 4

Given a graph of a function, estimate specific values of the derivative, and/or produce a sketch of the derivative function.

Here is the graph of some wacky function $g(t)$:

Sketch the graph of $g'(t)$ on the blank axes below.
